PROFESSIONAL EXPERIENCE

As a software engineer with a strong focus on system development, I've immersed myself in diverse global technologies. My expertise lies in empowering both ideas and companies to rapidly expand by crafting user-friendly web applications and optimizing internal systems for enhanced accessibility and convenience.

WORK EXPERIENCE

Web Developer

1. **Web3 Trading Bot | Marketplace**
   - Aug 1, 2022-2023
   - Our goal is to create a user-friendly web platform that facilitates the buying and selling of trading bots.
   - Technology: **Blockchain, Smart Contract, ReactJS, Material UI, Docker, and Figma**

2. **Proadvisor | Web application**
   - June 1, 2023- July 20, 2023
   - To build a comprehensive platform for financial advice in Cambodia. Users will have the ability to compare banks, loans, interest rates by term, and promotional offers.
   - Technology: **Figma, ReactJS, TailwindCSS, Docker, SpringBoot, and Vercel**

Mobile App & Desktop Developer

1. **Vconnect | Mobile App**
   - Jan 1, 2022- March 1, 2022
   - You can easily share your contact info on your phone by just scanning a special code. It also saves that info right on your phone without you having to do anything extra.
   - Technology: **Figma, Flutter, API**

2. **PomoDesk | Desktop Application**
   - Nov 10, 2022- Jan 10, 2023
   - It is a ToDo list desktop app where you can make a list of tasks you want to get done, and it even plays music in the background while you work."
   - Technology: **ReactJS, TailwindCSS, Vite, TypeScript, Electron js, PostgreSQL**
